

# WHITTLE WAXES FLOOR CARE CONCENTRATE

## INFORMATION SHEET

### Product Description: Whittle Waxes Floor Care Concentrate

Natural cleaning, and care treatment for internal wood surfaces.

- **Mopping Additive** designed to both clean and maintain floors finished with Hardwax Oil and our other finishes.
- **Protects:** Floor Care leaves a thin replenishing, protective layer on the surface, without making the surface slippery.
- **For various surfaces:** Cleaning of waxed and oiled surfaces, flooring, paneling, ceiling lining, doors, furniture, countertops and laminate, as well as lacquered parquet and cork surfaces.
- **Safe Meets Australian and German regulations on combustible liquids. Safe** for humans, animals and plants after drying. Food and toy safe. Contains no biocidal substances or preservatives.

#### Recommended Tools:

Mop, spray bottle, measuring spoon, cloth

#### Coverage Rate:

N/A

#### Sheen Levels: N/A

**Container sizes:** One Litre spray bottle, or 1 Litre Floor Care concentrate.

**Storage:** Cool but frost-free.

**Drying time:** Similar to other cleaning products.

**Coats needed:** Single coat system

### Surface Preparation

Dry-clean (broom or vacuum cleaner) the floor prior to washing.

Clean and maintain floor as needed.

### Small surfaces

- Use the spray bottle and cloth or micro-fibre mop.
- Use a mop and bucket for larger areas. Micro-fibre mops are fine on Hardwax Oiled Floors, however, **please do not use them** on other coatings such as Object Oil, One Coat 100, and Treatex Eco as they can possible remove a thin layer of oil over time.

### Maintaining Hardwax Floors:

1. Our Whittle Waxes Spray and Glide mop makes cleaning easier, we highly recommend using this cleaning technique.
2. Otherwise add approximately 25-30 ml Whittle Waxes Floor Care to 6-8 litres of fresh water (1 bucket) and mop moist.
3. Pick up moisture with wrung out cloth.
4. Alternatively mix ½ a teaspoon of concentrate into a 1L spray bottle, mist the floor and dry mop.
5. **Do not mop with water only**, because this will remove the protective film.

### Maintaining Oiled Floors:

1. Add approximately 80-100 ml Whittle Waxes Floor Care to 6-8 litres of fresh water (1 bucket) and mop moist.
2. Do not use Micro-fibre Mop as these strip oil from the surface.
3. Pick up moisture with wrung out cloth.
4. **Do not mop with water only**, because this will remove the protective film.

# WHITTLE WAXES FLOOR CARE CONCENTRATE INFORMATION SHEET

## Helpful Advice

- Regular care with floor care will increase its resistance and ensure a longer time between coats.
- When the floor or surface has some minor scratching or slight staining, uses Whittle Waxes Object Oil (Repair Wax) See information sheet on our website.
- For a more aggressive cleaning before a total recoating use Whittle Waxes Preparation Cleaner. Please refer to information sheet on our website and contact us for advice before using Preparation Cleaner as it will remove a thin layer of wax and oil from the surface.
- For more information refer to our Cleaning, Care and Maintenance sheet on our website.

## Ingredients:

Water, <5% natural soaps, soy lecithin, potash, preservatives, <5% anionic tensides, <5% non-ionic tensides, coconut fat tensides, (benzothiazolinone, methylthiazolinone).
